Local Historic District designation is a tool that residents may use to encourage the proper planning and preservation of their neighborhoods. These districts have been developed to avoid or limit development in areas that are historic or have important architectural or cultural qualities.

Local historic districts are recognized as having cultural, historical, or architectural significance and are protected by law from certain types of development. They are designed to create a setting for historic neighborhoods with similar characteristics. In local areas where there are many such neighborhoods, planning controls may be directly applied to entire districts, thereby avoiding the need to control each individual property.

Local historic districts often encourage residents to develop and maintain their neighborhoods in a manner that contributes to the overall quality of the neighborhood. They may require that new construction be consistent with the existing character of the neighborhood.

A local historic district is a geographic area that is designated as having local historic significance. It is a planning tool that is used to preserve the unique character of an area. It is a way to protect the characteristics of a neighborhood from inappropriate changes. A local historic district is a tool that can be used to encourage the proper planning and preservation of a neighborhood.

Local Historic District

National Register of Historic Places District

1127 W. Berry Street
Stick Style, c. 1895
The house may have been a member of the Leroy Heights factory housing project, built by the John M. Peters Company. It was a typical four-room flat with English basement. It has a one-story entrance porch, which is fluted, and a one-story bay window. The house features a variety of decorative details, including a front gable dormer, a dormer window on the side, and a pedimented entry.

John & Barbara
1449-1453 W. Jefferson Blvd.
Goff-Starr, c. 1900–1900
The building is a two-story, brick structure with a flat roof. It has a symmetrical facade with three windows on each floor. The second story has a continuous band of small, round-arched windows. The building is typical of the Romanesque Revival style, which was popular in the late 19th century.

1106-1130 Beckhill Street
Goff-Starr, 1905
The building is a two-story, brick structure with a flat roof. It has a symmetrical facade with three windows on each floor. The second story has a continuous band of small, round-arched windows. The building is typical of the Romanesque Revival style, which was popular in the late 19th century.

1469 Broadway
Chateauesque, c.1890
The building is a two-story, brick structure with a flat roof. It has a symmetrical facade with three windows on each floor. The second story has a continuous band of small, round-arched windows. The building is typical of the Romanesque Revival style, which was popular in the late 19th century.

1453-1455 Beckhill Street
Chateauesque, c.1890
The building is a two-story, brick structure with a flat roof. It has a symmetrical facade with three windows on each floor. The second story has a continuous band of small, round-arched windows. The building is typical of the Romanesque Revival style, which was popular in the late 19th century.

1459-1461 Beckhill Street
Chateauesque, c.1890
The building is a two-story, brick structure with a flat roof. It has a symmetrical facade with three windows on each floor. The second story has a continuous band of small, round-arched windows. The building is typical of the Romanesque Revival style, which was popular in the late 19th century.
